

Export Order Records

Jennifer M - 2022-01-17 - Manage Orders

The first step to exporting order information is to choose the order(s) you would like to export. Data can be exported individually, selected, or all at once. To do select a single order, use the checkbox to the left of the order number in the Quotes, Orders, Invoices, or Sample Requests tabs.

Use the checkbox at the top to select all the orders currently shown. Using this option will display a message asking if you would like to select all records. If you would like to select all records, click on the link in the message.
